

Combined Experience for innovative RF Testing & Automation

Noffz Technologies

NOFFZ delivers measurement and automation systems and turn-key solutions based on the Universal Tester Platform (UTP) to customers in all industries worldwide.

The UTP is in use for the entire product creation process to accelerate product development, reduce manufacturing costs, achieve superior quality throughout the lifecycle, and solve critical supply chain issues.

Incorporated in 1989, NOFFZ is one of the biggest Platinum Alliance Partner of National Instruments with RF Speciality and focus on Wireless Production Test with NI WTS (Wireless Test System).

For IoT products—Multi-DUT Test with
Noffz UTP 9011 & Enics RF Adapters

Enics Raahe

Enics Raahe Oy has developed two tester product families, Chameleon for End Of Line testing and Gecko for PCBA Testing.

The Chameleon test systems can be used for testing of e.g. tablet computers, vehicle infotainment systems, displays and touch screens. Chameleons cover various test phases from early R&D to final product testing. The Gecko products are ideal for PCBA testing, and include testing features such as panel level and functional testing, RF testing and SW programming.

Enics Raahe Oy is a National Instruments Silver Alliance Partner. In addition to test systems, Enics Raahe Oy offers original design manufacturing (ODM).

Chameleon 157—High-End Audio & Display testing
with RF Shielding

Our Expertise

UTP 9011 features with NI WTS

Wide range of testing capabilities from AIO/DIO, ICT, Vision Display, RF, Audio, Haptic
Specialized with RF test and DUT control from R&D to production
Multi-DUT Test applications with optimal instrument sharing
Great performance at best cost

Your Benefits as a Customer

Turnkey solution for complete test system including

- Test platform
- RF instruments
- Test instruments
- Software

Single source delivery
Combined Experience

Chameleon & Gecko Benefits

All test phases from R&D to volume production
Short throughput for high volume production
Maximized testing with minimized customization
Flexible Construction - long lifecycle of test equipment

Multi-DUT mixed signal Test Solutions

UTP Tester Platform
In-Line / Offline

UTP SW with
NI TS, NI LV,
.NET, MS SQL

HW Tools with
>1000 PXI Modules

NI WTS—Wireless
Production Tester

PCBA & EOL Fixtures

Touch Screen &
Display Testing

RF
BT / WLAN
GPS

Physical Buttons
